DETAILED ACTION

1. Applicant's arguments filed on 04/4/28/03 are moot in view of the new grounds of rejections.

2. Claims 1-43 are remained and claim 44, has been added.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4, and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, Claims 1-2,11-12,17-18,21-22, 31-32, 37-38, 41- 42, recites ["a preset cutoff average percentage of new credit card debt to a total credit card debt and"]. However this language fails to distinctly claim Applicant's invention because the scope of the claim is unclear. Moreover the specification fails to clarify, the meaning of the limitation. Appropriate correction is required.

5. 35 U.S.C. § 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

6. Claims 1-44, are rejected under 35 U.S.C. § 101 because, the claimed invention is directed to a non-statutory subject matter. Specifically the claims are directed towards an abstract idea. Claims 1-44, represent an abstract idea that does not provide a practical application in the technological arts. There is no post-computer process activity found, the claimed invention performs mathematical calculations with no post solution activity. Therefore applicant is reminded to embed a computer or processor or module

Art Unit: 3628

into claims 1-44, in order to overcome this 101 rejection, appropriate correction is required.
